

# Shoehorning Yolngu language names into the ISO 639-3 standard

Cathy Bow

# Acknowledgements

- \* Michael Christie, Brian Devlin, John Greatorex (CDU)
- \* Melanie Wilkinson (NT Dept Education)
- \* Marilyn McLellan, Chuck Grimes (AuSIL)
- \* Dany Adone (U Köln)
- \* Waymamba, Mätjarra, Dhangal, Räkay (Yolŋu elders)

# Introduction

- \* Identification / naming of languages highly contested
- \* Standardisation as a useful goal
- \* Unique codes are important for digital documentation
  - \* Consistency
  - \* Discoverability
- \* Names are too ambiguous for search engines
- \* But ideal standard is virtually impossible

# Standard codes

- \* International Standard ISO 639-3
  - \* Recommended for use in language documentation (eg OLAC) and other fields (W3C)
  - \* Used by many archives and language documenters
- \* Flat structure is simple but masks many complexities
- \* No discussion of ISO 639-5 (language families) or 639-6 (language variants)

# Yolngu languages

- \* 'Yolngu Matha' ('people's tongue') describes a group of related languages from North East Arnhem Land
- \* Isolate of Pama-Nyungan group

- \* Among the strongest in Australia – culture, art, music, bilingual education

# Classification of languages

- \* General agreement on Yolŋu as distinctive 'bloc'
- \* Complicated question about how many languages, dialects, varieties
- \* Each 'clan' (*bäpurru*) has own language variety (*matha*)
- \* Mutual intelligibility among contiguous varieties
- \* Multilingualism, 'mother tongue' and father's language
- \* Linguistic distinctions

# Linguistic Differences

- \* Phonological (eg stop contrast)
- \* Morphological (eg pronominal stems)
- \* Syntactic (eg metrical tense distinctions)
- \* Pragmatic (eg contrastive discourse suffix)
- \* Example of vowel deletion: (Wilkinson 1991)

Gup.	<i>dhuwala+nydja</i>	<i>yatjkurru</i>	<i>mirithirri</i>	<i>bili+na</i>	<i>ŋarra</i>	<i>dhipuŋuru+nydja</i>
Djamb.	<i>dhuwan=dja</i>	<i>yatjkurr</i>	<i>mirithirr</i>	<i>bili+n</i>	<i>ŋarra</i>	<i>dhipuŋur+nydja</i>
	"this/here"+PROM	bad	Intensifer	COMPL+SEQ	1 sg	"this/here"-ABL+PROM
	This is really bad. I'm finished here

          - \* Djapu
        - \* Gumatj

## YOLNGU SUBGROUP

- Ya\* Southern Yolngu subgroup
- Ya1 Dhuwal/Dhuwala (possibly also Dhuwaya) – Morphy (1991), Wilkinson (1991)  
dialects include – (a) Dhuwala varieties (Yirritja moiety): Gupapuyngu, Gumatj; (b) Dhuwal varieties (Dhawa moiety): Djambarrpuyngu, Djapu, Liyagalawumirr, Guyamirlili (Gwijamil)
- Ya2 Dhay'yi (may be one language with Ya1)  
dialects: (a) Dhalwangu; (b) Djarrwark
- Ya3 Ritharngu (or Dhiyakuy) – Heath (1980a)  
dialects include: (a) Dhiyakuy, Ritharngu; (b) Wagilak, Manggurra
- Yb\* Northern Yolngu subgroup
- Yb1 Nhangu  
dialects include: (a) Gorlpa; (b) Yannhangu
- Yb2 Dhangu  
dialects include: (a) Wan.gurri, Lamamirri; (b) Rirratjingu, Gaalpu, Ngayimil
- Yb3 Djangu  
dialects include: Warramiri, Mandatja
- Yc\* Western Yolngu subgroup – Waters (1989)
- Yc1 Djinang  
dialects: (a) Wurlaki, Djardiwitjibi, Mildjingi, Balmbi; (b) Marrangu, Murrungun, Manyarring
- Yc2 Djinba  
dialects include: (a) Ganhalpuyngu; (b) Manjdjalpuyngu

Dixon 2002

# Response of a Yolngu elder

- \* Dr Waymamba Gaykamanju (Milingimbi):
- \* Gupapuyngu and Gumatj are “both Dhuwala but completely different
  - \* songlines, country, relationships
- \* No accurate way of matching Yolngu systems with balanda (Western) classifications

# Additional fields

Classification	Meaning	Example 1	Example 2
Dhäruk	Language group	Dhuwal	Dhaŋu
Bäpurru	Patrilineal clan	Djapu	Wangurri
Ḹikan yäku	Used as surname	Munungurr	Dhurrkay
Ḹuku wäŋa	Homeland	Boruwuy	Dhälinybuy
Moiety		Dhuwa	Yirritja
(Mala)			

# Additional fields

Classification	Meaning	Example 1	Example 2
Dhäruk	Language group	Dhuwal	Dhaṇu
Bäpurru	Patrilineal clan	Djapu	Wangurri
Ḳikan yäku	Used as surname	Munungurr	Dhurrkay
Ḳuku wäṇa	Homeland	Boruwuy	Dhälinybuy
Moiety		Dhuwa	Yirritja

# ISO 639-3

- \* Standard for representation of names of languages
- \* Registration authority is SIL International
- \* Linked to Ethnologue but distinct
- \* Completely flat structure – does not allow hierarchy

# Previous discussion of ISO

- \* PARADISEC Conference 2013
- \* Morey, Post, Friedman: The language codes of ISO 639: **A premature, ultimately unobtainable, and possibly damaging standardization**
- \* Musgrave, Barwick, Walsh, Treloar: Language Identifying Codes: Remaining Issues, Future Prospects
  - \* Walsh's demonstration of 'Yolngu flop' – invisible on Ethnologue

\* Circular description of Yolngu languages

# ISO codes for Yolngu

- \* Walsh describes a “linguistic tardis”
- \* **Dhuwal [duj]** – population 600
  - \* Dialects: Dativuy, Dhuwal, Dhuwaya, Djapu, Liyagalawumirr, Liyagawumirr, Marrakulu, Marrangu
- \* **Djambarrpuyngu [djr]** – classified as Dhuwal – popn 2760
- \* **Gumatj [gnn]** – classified as ‘Dhuwal’ (a) – popn 240
- \* **Gupapuyngu [guf]** – classified as Dhuwal – popn 330

# ISO codes for Yolngu

- \* 7 of 9 'this' level languages have codes
  - \* *Dhangu/Djangu, Yan-Nhangu, Dayi, Dhuwal, Ritharrngu, Djinang, Djinba*
- \* Plus three significant 'clan' languages have codes
  - \* *Djambarrpuyngu, Gupapuyngu, Gumatj*
  - \* (which belong to the above categories)

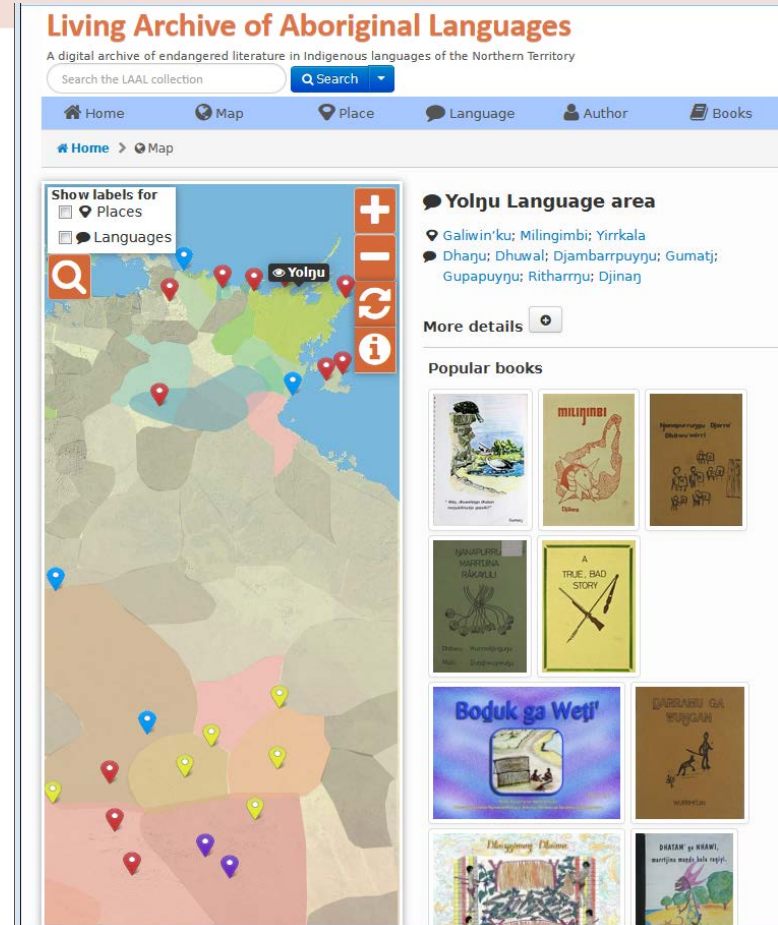

# ISO codes for Yolngu

'THIS' level	'Clan' level
* Dhuwala	Gumatj [gnn], Gupapuyŋu [guf],
* Dhuwal [duj]	Djambarrpuyŋu, Djapu, Daatiwuy,
* Dhay'yi [dax]	Dhalwaŋu, Djarrwark
* Dhaŋu [dhg]	Galpu, Golumala, Daymil, Wangurri
* Djaŋu	Djaŋu, Warramiri
* Ritharrŋu [rit]	Ritharrŋu, Wägilak, Yakuy
* Nhaŋu	Yan-Nhaŋu [jay], Gurjindi,
* Djinaŋ [dji]	Djinaŋ, Wurlaki
* Djinba [djb]	Djinba, Ganalbina

# Requests for change

- \* LAAL requested changes at 'clan' level
  - \* Create new codes to allocate to books in LAAL
  - \* Split some 'this' level languages to create new codes
- \* Create Yolngu 'macrolanguage' (cf Arabic, Chinese)
- \* Rename 'Djangu' back to 'Dhangu' (changed 2012)
- \* 17 requests in 2013

# Requests rejected

\* SIL International ISO 639-3 Registration Authority  
response to request to split Dhuwal:

*"The RA notes that the eight varieties are said to be clan languages that are 'significantly intelligible' as stated in the request. Since they are intelligible, they should be considered part of the same language for purposes of ISO 639-3."*

# Requests rejected

"The request to create the code [ynm] for **Yolngu (macrolanguage)** is rejected. The request to create a Yolngu macrolanguage was a consequence of the requests no. 2013-025 and 2013-026 to split the codes for Dhangu [dhg] and Dhuwal [duj]. **Since those two requests were rejected, there was no need to create the macrolanguage.**"

# New approach to requests

- \* Tidy up 'this' level
  - \* Add Dhuwala and Djanu – 6 separate forms
  - \* Existing Dhanu [dhg] code includes Djanu so need to retire and replace [dhg]
- \* Demonstrate linguistic differences

# Alternative systems

- \* Glottolog
- \* AUSTLANG (AIATSIS)
- \* ASCL (used by ABS for census)
- \* Multi-Tree

Ritharrngu	Show names >>
Dhay'yi	Show names >>
Dhiyakuy	Show names >>
Djinang	Show names >>
Djinba	Show names >>

# Preferred solution

- \* Three codes for each Yolŋu book in Living Archive
- \* Yolŋu – to allow browse/search across all sub-groups
- \* 'this' level – to aggregate these together
- \* 'clan' level – to follow identification within book

## YOL-DHG-GGN

- Yolŋu
  - Dhaŋu
    - Gälpu/Golumala/Daymil

# Other issues

- \* Community consultation – how wide?
- \* Problem of Dhuwaya – koine language of Yirrkala
- \* Ambiguity of Dhuwal (koiné and ‘this’ level)
- \* Retrospective effects of proposed changes
- \* Validation through representation

# Summary / Conclusion

- \* Not a unique situation, even in Australia
  - \* Biniṅj Gun-wok, Western Desert languages
- \* Necessary trade-off in desire to represent complex structures in a simple, consistent manner
- \* 'Perfect' system does not exist
- \* Remains a contested space

## Yolngu languages

From Wikipedia, the free encyclopedia  
(Redirected from [Yolngu Matha](#))

### Varieties [\[edit\]](#)

Yolngu Matha consists of about [six mutually intelligible languages divided into about thirty clan varieties and perhaps twelve different dialects](#), each with its own Yolngu name. Put together, there are about 4600 speakers of Yolngu Matha. While there is extensive variation between these dialects, there is generally common mutual intelligibility, hence the umbrella group of Yolngu Matha. The linguistic situation is very complicated, since each of the 30 or so clans also has a named language variety. Dixon (2002) distinguishes the following:<sup>[2]</sup>

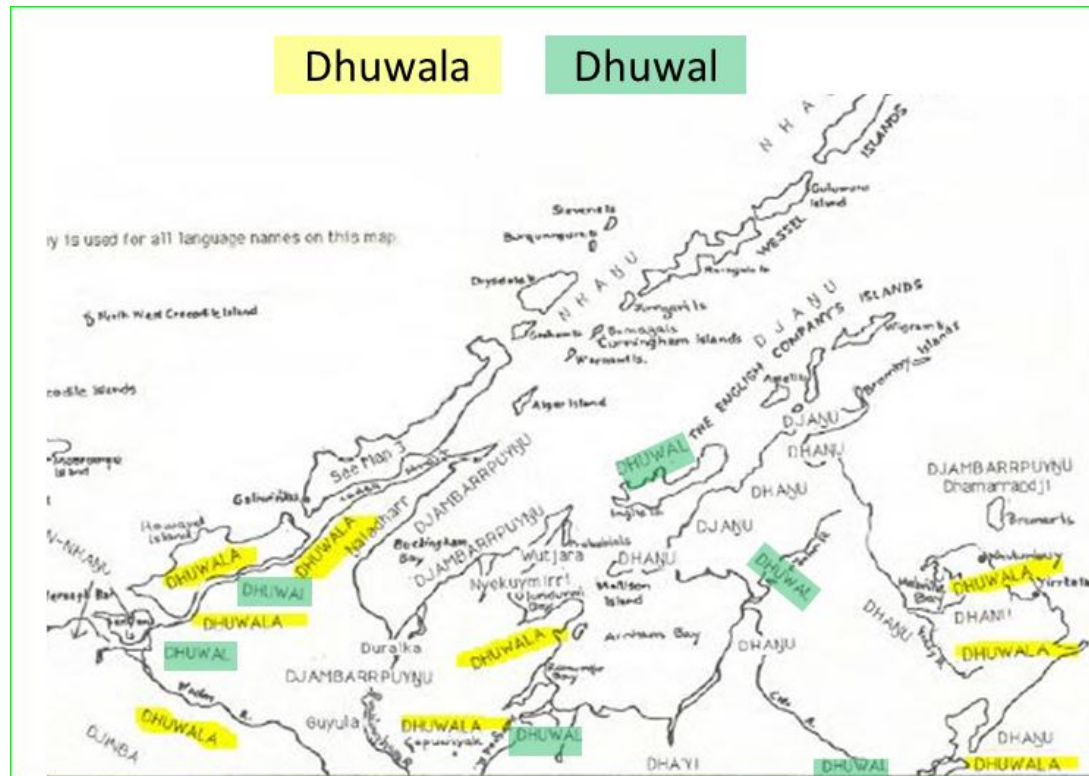

- Dhangu
  - [Dhanu](#)
  - [Nhanu](#)/Jarnango (Golpa)
  - [Djanu](#)
- Dhuwal
  - [Dhuwal](#) (Dhay'yi, Gupapuyngu)
  - [Ritharmu](#)
- Djinang
  - [Djinan](#)
  - [Djinba](#)

Bowern (2011) adds the varieties in parentheses as distinct languages.

# Naming of languages

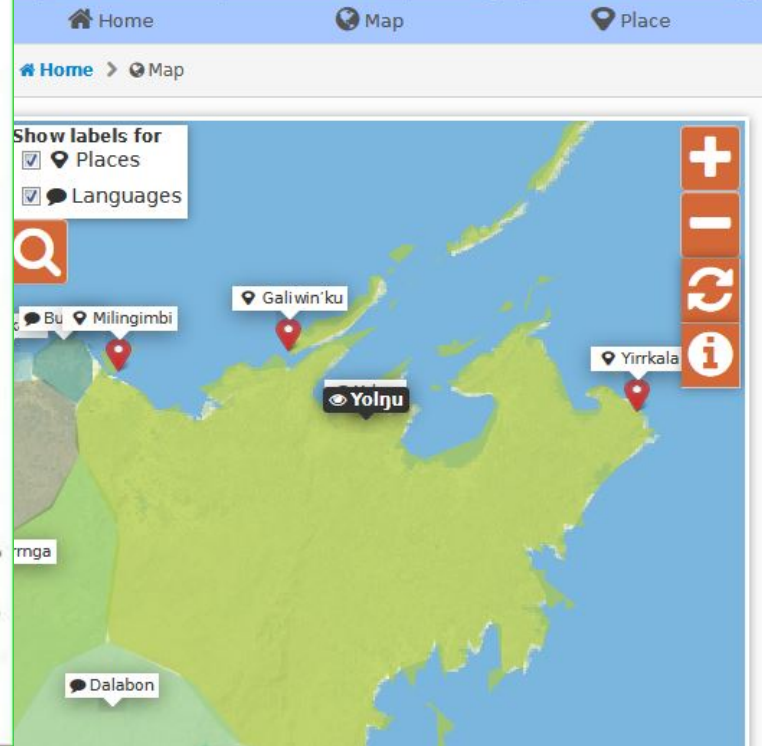

- \* Even at 'this' level
  - \* Dhanu / Djanu – ISO story
  - \* Ritharrnu (Ritarungo) = Yakuy = Dhiyakuy
- \* Naming of discrete language entities for coding
- \* Spelling distinctions
  - \* Dayi, Dhay'yi, Dha'yi, Dha'i?
